Re: City Administrator Report for the week of May 8th through May 14th
Date: May 8, 2017

Please find a brief overview of city operations for this week. If you have questions, please give me a call or e-mail.

Public Works Items of Note:

- Today's average water table depth is 40 feet.
- Public Works crews are conducting daily and weekly scheduled checks and necessary permit compliance operations.
- The staff is focused on brining the pool up to speed in time for the planned May 20th opening. For more information on the 2017 GMP, please see the attached flyers.
- The 2017 mosquito spray season is in full swing with operations beginning at 10pm on Monday and Wednesday nights. Spraying operations cannot occur in winds exceeding 15 mph as the fog dissipates and is rendered ineffective. The chemical is a contact chemical that kills mosquitoes on contact.

Administrative Items of Note:

- Community Development is currently working 18 active code violation cases.
- Staff is working to ensure that public space and right-of-way mowing occurs in a timely and complete manner. To date, none of the areas have been mowed in a single week, and last week 16.32 acres of the total 38.1 acres was completed. The week of April 24th through 28th is the most comprehensive mowing with 27.63 acres completed. I have spoken with the contractor and expect all areas to be mowed this week.
- Tonight, May 8th at 7pm, the Planning Commission will meet to consider the annexation and zoning request for the construction of duplexes in a MF-2 (multi-family 2) land use. The matter was tabled last month after conducting a public hearing.

SCHEDULED 5/15 AGENDA ITEMS:
